

Ananya Gulati

Senior Software Engineer

Professional Summary

Results-driven Senior Software Engineer with 5+ years of experience specializing in server-side development and microservices architecture. Proven expertise in building scalable, configurable solutions. Recognized for problem-solving, leadership and cross-team collaboration.

Experience

GEP Worldwide — Senior Software Engineer

July 2020 - PRESENT

- Built and maintained 5+ microservices for different aspects of the application, leading development cycles and migration activities.
- Intensively collaborated with multiple teams as part of delivery.
- Led a data migration of ~3m records in MongoDB using python in Databricks resulting in smooth onboarding to the low-code platform.
- Built services to configure http calls from database reducing development time by ~30% and resulting in ~20% increase in application configurability.
- Built object validation engines, notification frameworks, cross-app interfaces, BPMNs & reusable plugins among a host of services.
- Built an ETL pipeline on Azure Databricks in python, which processes ~150 million records from flat files to Mongo

Illinois Institute of Technology, Chicago (United States) — Research Immersion Program

May 2019 - July 2019

- Cleaned, normalised, mapped and evaluated gigabytes of tabular genetic data using python libraries
- Designed a statistical model to shortlist probable compounds as a treatment for the Alzheimer's disease

Education

Birla Institute of Technology, Mesra, Ranchi, India — Bachelor of

Engineering - CGPA – 7.78

Information Technology (2016-2020)

Industrial Projects

Time Series Application - .NET Core, MongoDB, SQL

Forecasting application to facilitate item movement between buyer and supplier. Built services for a super configurable application that can handle large time series data.

Quality Management Solution - node.js, .NET Core, Angular, MongoDB

A low-code target app. Form based application allowing supplier/item level evaluation for ensuring supply of quality products to the buyer.

Inventory Management Mobile App - React Native

A mobile app which was integrated with a Zebra barcode scanner device. This app allowed the user to manage item inventory. Designed dynamic data-driven UI components. Integrated Zebra barcode scanning devices.

Exp: 5+ years

Awards

- National Talent Search Scholar (NCERT, GOI)- 2014
- Smart India Hackathon 2019 – Onsite Finalist (Team)
- GEP SPOT Recognition - 2021
- GEP Change Agents - 2020

Experience working on

C#

.NET Core

TypeScript

HTML5 - CSS/SASS

SQL

OOPs

SQL/NoSQL Database

Microservices Architecture

Data Structures

MongoDB

Git

Responsive Web designing

RESTful Web Services

Agile Methodologies

Python

React Native

Angular

Languages

English, Hindi

Interests

Guitar, Meditation
